Sample Cat Résumé

It is important to show a potential landlord how serious you are about being a responsible guardian for your companion. Having a résumé is a good start.

Tiger

Humane Friend, guardian
12 Airport Blvd.
San Mateo, CA 94401
650/340-7022

Profile

Tiger is a lovable lap cat who has been with me for three years after he parked himself at my front door. He is indoor-only and enjoys his scratching post tree and sitting in the sunshine. He is about three and half years old.

Activities

As an indoor-only cat, I give Tiger plenty of exercise and mental stimulation to keep him happy and healthy. Every morning before I go to work and every evening after I get home, we have a play session. During the day he lounges near a window to watch the world go by. Or, if he gets some energy, he chases a ping pong ball around the bath tub (it really wears him out).

Health/Grooming

Tiger is current on his vaccinations, including Rabies. I had him neutered when he was about six months old. Regular brushing (which he loves) and nail clipping are also part of our routine. Tiger never goes outside, so fleas are not an issue. However, if needed, I apply Advantage to prevent an infestation. Tiger is also litterbox trained.

About Tiger's Guardian

Tiger is my first cat as an adult, but I grew up with cats. I have educated myself so as to better understand a cat's needs and behaviors. When I go on vacation, I hire a trusted professional pet sitter to stay with Tiger.

References

Tiger's current landlord can be contacted at 650/340-7022. Prospective landlords are welcome to visit him in our present home. See attached letter from my friends and veterinarian. (optional)

Sample Dog Résumé

It is important to show a potential landlord how serious you are about being a responsible guardian for your companion. Having a résumé is a good start.

Millie

Animal Lover, guardian
12 Airport Blvd.
San Mateo, CA 94401
650/340-7022

Profile

Millie is a smart, attentive and mellow young dog. She is a 2-year-old, Hound mix whom I adopted when she was six-months-old. When I want to play she plays, when I want to relax, she relaxes with me. Millie is very flexible and easygoing.

Training

Millie and I have been through three training classes together to learn all of the basic verbal commands and hand signals. She is fully housetrained and barks only a few times when strangers come into the house.

Activities

I take Millie to the dog park at least four times a week. We take walks at least once a day and we play in the back yard before dinner and before bedtime. She also goes with me to lots of places like my friends' houses, the park and the beach.

Health/Grooming

Millie is spayed and is current on her vaccinations. She has very short hair, but I brush her once a week and bathe her every other weekend. I also apply Advantage for flea control.

About Millie's Guardian

I have had many dogs in my lifetime and been through lots of different obedience classes. I always clean up after Millie and never let her out of my control. When I go out of town, I have a very good friend who takes care of Millie at her home.
